A Frontend Developer with hands-on experience in crafting dynamic and responsive web applications using modern technologies. Adept at building user-friendly interfaces that enhance user experience and contribute to the overall success of projects. Proven ability to deliver high-quality solutions on time and within scope. Seeking to leverage my skills in a challenging role where I can continue to grow and make a meaningful impact.

SKILLS

Programming languages: HTML, CSS, JAVASCRIPT

Frameworks: BOOTSTRAP

Tools: GIT, GITHUB, CANVA

EDUCATION

Bachelors of Science Computer Science with Data Analytics

2021-2024

CGPA-80%

KPR College of Arts Science and Research, Coimbatore- 641407

PROJECTS

Currency Converter

Live Website

- Developed a currency converter using the Frankfurter API to fetch real-time exchange rates and provide accurate currency conversions.
- Implemented dynamic dropdown menus to select currencies and display conversion results, enhancing the user experience with real-time data processing.
- Utilized JavaScript for handling API requests, form validation, and event-driven logic to ensure smooth and interactive functionality.

Ouick Notes Live Website

- Developed a notes application using local storage to persist user data, allowing users to add, update, and delete notes without losing data upon page refresh.
- Created a user-friendly interface that dynamically generates text areas for each note, enabling seamless note-taking and management.
- Utilized JavaScript for handling event-driven interactions, note updates, and real-time changes, ensuring smooth user experience and data consistency.

EXTRA CURRICULAR ACTIVITIES

I use GitHub to host and deploy my projects, allowing me to test how they function across different users and devices. This experience helps me ensure cross-platform compatibility and provides hands-on practice in project deployment and version control.

CERTIFICATION

Completed a Full Stack Python course with a duration of 3 months and earned a certification.
